Växjö, Sweden

Mikael Wedham is among other things a Microsoft Certified Solution Developer and an IT Professional on SQL Server 2008. He has worked as a developer and database administrator since 1993. He has also been a support technician. Since 2007 is Mikael also a certified Open Water Specialty Instructor and Emergency First response instructor. On his spare time, Mikael is crew on a rescueboat on Rescuestation Kronoberg for the Swedish Sea Rescue Society.

Currently Mikael is a much appreciated trainer of development and database classes for the Swedish CPLS Addskills and Informator among others. He also does certification training and courseware writing for these centers. Part of his thorough pedagogic training is from DSAT.

Mikael was one of the first in Sweden who delivered training on the Microsoft OLAP Services Server for SQL 7.0 and is still hired as Business Intelligence expert on SQL Server 2005/2008. Mikael has worked as a lab proctor and in the "Ask The Experts" booth on Tech Ed. He is also a speaker at IT conferences.

Mikael is a consultant with focus on development and databases. Most of the assignments are optimizing and proactive analysis, but Mikael does a lot of mentoring as well. Development and system design are also a few of the tasks Mikael performs for customers all over the country.
